HANDS-FREE FUNCTIONALITY WITH VOICE RECOGNITION

The basic characteristic of **Blue&Me™ Nav** is its high-level of voice recognition system even when the mobile device does not feature this capability. This system enables you to make or receive phone calls in a safe and secure way, as required by current law regulation, using either voice commands or steering wheel buttons.

- ❒ **Blue&Me™ Nav** supports most of the mobile phones equipped with the **Bluetooth**® wireless technology (for further details, see the **Blue&Me™ Nav** User Manual).
- ❒ Up to 5 mobile phones can be paired/registered, in case of contemporary presence in the car, **Blue&Me™ Nav** will use the most used as default.
- ❒ Voice recognition uses advanced Speech Independent technology (advanced speech recognition system).
- ❒ The personal phone book, last calls included, can be completely downloaded to **Blue&Me™ Nav**.
- ❒ It is possible to do the following: contact calling by voice and Digit dialling by voice - a phone number can be dialled by speaking the digits or calling a contact present in the phonebook; browsing the phonebook, displayed on the dashboard, both by voice or by steering wheel commands.
- ❒ **Blue&Me™ Nav** uses the mobile phone ring tone (it depends from the mobile phone connected).

MESSAGE READER

The **Blue&Me™ Nav** message reader enables automatic reading, through the car sound system, of the SMS texts you receive on your **Bluetooth**® wireless technology mobile phone. The message reader will also interpret any abbreviation (e.g. "ILUVU" will be read like "I love you") and emoticon (e.g. :-) will be read like "Smile") contained in the SMS text.

The **Blue&Me™ Nav** message reader enables the following operations:

- ❒ To display on the instrument panel multifunction display a visual notification signal indicating that you have received a new SMS text on your **Bluetooth**® wireless technology mobile phone, with sender's number/name; **Blue&Me™ Nav** will also propose you to read the message received
- ❒ To manage the list of SMS texts received on your **Blue&Me™ Nav** paired mobile phone
- ❒ To read again the messages received and stored
- ❒ To call the SMS text sender using the buttons on the steering wheel or voice commands
- ❒ To delete individual messages or the entire inbox using the buttons on the steering wheel or voice commands.

MEDIA PLAYER

The **Blue&Me™ Nav** media player application enables you to play digital audio stored on a portable device through the car's audio system. The media player offers the following features:

❒ Playing digital audio: enables you to play all of your digital audio files (.mp3, .wma, .wav), or play a personal playlist (both .m3u and .wpl file formats). It does not support other audio file extension.

❒ Categorizing digital audio: enables you to browse and play all digital audio belonging to a category, such as an album, an artist, or a genre.

❒ Using playback functions: provides playback functions such as play, stop, next track, previous track, shuffle, and loop track.

To use the media player, simply connect your portable device to the car's USB port. When you have selected the digital audio that you want to listen to, **Blue&Me™ Nav** plays it through the car's audio speakers.

NAVIGATION SYSTEM

The **Blue&Me™ Nav** navigation system allows you to reach a required location quickly and safely. You will be taken to your destination by means of voice messages and pictogram instructions shown on a the vehicle's reconfigurable multifunction display.

The navigation system allows you to:

❒ **Enter a new destination** – you can enter the address of a desired destination, specifying the name of the destination street with the house number or simply the town/city centre.

❒ **Navigate to a point of interest** – you can call up as a final destination a point of interest selected from a category list (e.g. hotels, restaurants, airports, railway stations, authorised workshops, etc.).

❒ **Trip information** – **Blue&Me™ Nav** is able to provide estimated time of arrival and distance to a preset destination. It also allows you to display your car's position (latitude, longitude and number of GPS satellites received).

❒ **Recent destinations** – you may choose one of the destinations recently preset, stored by the system in a special list.

❒ **Navigation settings** – you can set your preferences for the route type, e.g. motorways, toll-roads or ferries.

❒ **Route simulation** – **Blue&Me™ Nav** allows you to simulate the type of route to your set destination in advance.

USING Blue&Me™ Nav BY VOICE COMMANDS

To use a voice command you have to push ⊞ to start a dialog with **Blue&Me™ Nav**.

Phone call management by voice command

❒ Making a phone call to a contact stored in the phonebook.
  — Push ⊞ and after the beep, say "call" followed by the Name stored (example "call John").
  — **Blue&Me™ Nav** recognizes the contact name and asks for confirmation on dialling and making the phone call, after your confirmation it dials the selected contact phone number through your mobile phone.

❒ Making a phone call through a number not stored in the phonebook.
  — Push ⊞ and after the beep say "dial a number".
  — **Blue&Me™ Nav** asks your "number, please."
  — You spell the number digit by digit (example 123456 => "one" "two" "three" "four" "five" "six").
  — **Blue&Me™ Nav** recognizes the number and repeats it.
  — If the number is right, **Blue&Me™ Nav** asks for confirmation on dialling and making the phone call, after your confirmation it dials the phone number through your mobile phone.
  — If the number is not correct, say "cancel" and repeat the number correctly.

Managing the SMS Message Reader

When you receive a SMS text, **Blue&Me™ Nav** will let you know with a sound signal and ask you if you want to read it:

❒ Say "**Yes**" to read the SMS text;

❒ Say "**No**" if you don't want to read it. The system will memorise the message so you can read it later.

Media Player management by voice command

❒ Skip to Next or Previous Media.

– During a Media playback, push , and after the beep say "Next" or "Previous".

– **Blue&Me™ Nav** skips respectively to the Next or Previous Media Track

❒ Stop the playback

– During a Media playback push , and after the beep say "Stop".

– **Blue&Me™ Nav** stops the Media playing.

❒ Ask for what is playing.

– During a Media playback push , and after the beep say "Now playing".

– **Blue&Me™ Nav** shows on the dashboard display the currently playing Media data.

Navigator Management

Proceed as follows to begin using the **Blue&Me™ Nav navigation** function:

❒ Connect the USB device provided with the **Blue&Me™ Nav** navigation kit with the map software to the USB present on the car.

❒ Ensure the ignition key is in **MAR** position.

❒ Press the control on the steering wheel and say "**Navigation**"; **Blue&Me™ Nav** will show the following warning message on the display **THE DRIVER MUST RESPECT THE ROAD RULES**. Now say "**New destination**" and then "**Address**". **Blue&Me™ Nav** will ask you the required country and you should say the country where your destination is located.

The system will ask you to enter the name of the destination city, starting with manual interaction and then completing using voice commands.

Use the ▲ or ▼ keys to scroll through the characters required to make up the name of the town/city and confirm each character selected by pressing the **SRC/OK** or **↘/MENU** keys.

As soon as you have entered enough characters, **Blue&Me™ Nav** will ask you to say the required town/city. You can also continue entering the name of the town/city using the steering wheel controls.

❒ Continue entering the destination road/street using the same method as when entering the town/city. The town/city centre may also be chosen as a destination.

❒ Specify the house number of the destination street by saying "**Enter number**" or say "**Start**" to begin navigation immediately.

Note

For road safety reasons, address input operations may only be carried out with the vehicle parked.
